

MODULE SPECIFICATION PROFORMA

Module Title:	Ceramics Throwing Techniques 1	Level:	4	Credit Value:	10
----------------------	--------------------------------	---------------	---	----------------------	----

Module code:	ARD420	New <input checked="" type="checkbox"/>	Code of module being replaced:	N/A
		Existing <input type="checkbox"/>		

Cost Centre:	GAAA	<u>JACS3</u> code:	W700
---------------------	------	--------------------	------

Trimester(s) in which to be offered:		With effect from:	June 17
---	--	--------------------------	---------

School:	Creative Arts	Module Leader:	Cerys Alonso
----------------	---------------	-----------------------	--------------

Scheduled learning and teaching hours	30 hrs
Guided independent study	70 hrs
Placement	0 hrs
Module duration (total hours)	100 hrs

Programme(s) in which to be offered	Core	Option
Standalone module to be aligned with BA (Hons) Applied Art for quality assurance and assessment purposes only	<input type="checkbox"/>	<input type="checkbox"/>

Pre-requisites
N/A

Office use only

Initial approval June 17

APSC approval of modification *Enter date of approval*

Version 1

Module Aims	
To increase the learner's understanding of a range of materials and processes available to the applied arts practitioner.	
To develop the learner's understanding of the design and making process to the realisation of completed artefacts.	
To foster evaluative thinking in individual creative design development.	
Intended Learning Outcomes	
Key skills for employability	
KS1	Written, oral and media communication skills
KS2	Leadership, team working and networking skills
KS3	Opportunity, creativity and problem solving skills
KS4	Information technology skills and digital literacy
KS5	Information management skills
KS6	Research skills
KS7	Intercultural and sustainability skills
KS8	Career management skills
KS9	Learning to learn (managing personal and professional development, self-management)
KS10	Numeracy
At the end of this module, students will be able to	
Key Skills	
1	Evidence a knowledge and understanding of identified materials and techniques through the production of innovative samples, experiments and test pieces
2	Demonstrate links between experimentation in materials and the design process
3	Design and produce satisfactory prototypes/completed artefacts
Transferable/key skills and other attributes	
<ul style="list-style-type: none"> Commitment and motivation through idea generation 	

Derogations

No derogations requested.

Assessment: Please give details of indicative assessment tasks below.

Critical discussion will take place during and at the end of assignments with group critiques and individual tuition forming the basis of ongoing formative assessment.

A body of work presenting design development and production will be presented at the end of the module. Students will be assessed on their exploration of materials and development of techniques in solution to set assignments. This should be supported by documentation of the working methods and contextual influences that the student has become aware of and used during the course of the module

Please indicate the type(s) of assessment (e.g. examination, oral, coursework, project) and the weighting of each (%). Normally, each intended learning outcome should be assessed only once.

Assessment number	Learning Outcomes to be met	Type of assessment	Weighting (%)	Duration (if exam)	Word count (or equivalent if appropriate)
1	All (1-3)	Coursework	100%	N/A	N/A

Learning and Teaching Strategies:

Students will elect an area of study from ceramics, glass, metals and mixed media

Students will be engaged in directed and independent study. They will receive workshop demonstrations.

At the end of each assignment, there will be a group critique during which students will self-criticise and evaluate their work to their peers and offer constructive criticism on the work of others in the group.

Syllabus outline:

This module is designed to encourage creative exploration and experimentation of a range of media and techniques within a chosen area of the applied arts.

Students will use ideas and design concepts and apply a variety of media and techniques both traditional and contemporary and which explore the boundaries of what is current practice within their chosen subject study to appropriate design solutions.

Indicative Content:

Applied Arts – The acquisition and development of a good working knowledge of materials and techniques that will both facilitate and inform creative processes in response to specific design problems.
