Breakdown of module hours

Learning and teaching hours	24 hrs
Placement tutor support	0 hrs
Supervised learning e.g. practical classes, workshops	0 hrs
Project supervision (level 6 projects and dissertation modules only)	0 hrs
Total active learning and teaching hours	24 hrs
Placement / work based learning	0 hrs
Guided independent study	176 hrs
Module duration (total hours)	200 hrs

For office use only	
Initial approval date	13/4/21
With effect from date	01/09/21
Date and details of	
revision	
Version number	1

Module aims

This module, following on from Work Based Learning 1, at Level 5 enables students to reflect on their working practice in order to identify and undertake professional development commensurate with the expectations of the Joint Board of Moderators professional body.

Module Learning Outcomes - at the end of this module, students will be able to:

1	Critically evaluate their own professional development needs and draw up a strategy, including a personal learning plan for meeting these, plan self- learning and improve performance, undertake and review continuous professional development, as a foundation for lifelong learning.
2	Assess problem solving skills, technical knowledge and understanding to create or adapt design solutions that are fit for purpose.
3	Locate, analyse and evaluate relevant information including environmental and sustainability aspects, health, safety, security and risk issues, intellectual property, codes of practice and industry standards and apply it to current issues, reflecting on how it contributes to effectiveness of their current practice within their field of employment.
4	Critically reflect on the need for a high level of professional and ethical conduct in engineering, together with an awareness of professional body codes of conduct, duty of care, corporate responsibility, customers and user needs, including the wider commercial, economic, social and engineering context and public perception.
5	Critically appraise design and technical solutions to civil engineering problems and evaluate how decisions and solutions are justified.

Assessment

Indicative Assessment Tasks:

This module will be assessed through the production of a portfolio of reflective reports supported by relevant evidence. Specific content of the reports will be informed by the knowledge, skills and behaviours associated with expectations of the Joint Board of Moderators, contextualised to their area of practice. The portfolio will be combined with the portfolio evidence produced from Work Based Learning module 1 and will in addition include a Curriculum Vitae and job description, a dynamic learning plan, Development Action Plan and CPD record, together with evidence, narrative and reflection for the remaining 19 JBM learning outcomes linked to the Employer Managed Further Learning. The specific outcomes undertaken will be chosen by the student in consultation with their Employer and with reference to their existing work based experience.

Assessment number	Learning Outcomes to be met	Type of assessment	Weighting (%)
1	1,2,3,4 & 5	Portfolio	100%

Derogations

Learning and Teaching Strategies

There are two aspects to the learning and teaching strategy: the taught element and the support element.

The taught element will consists of initial on-line workshops which will outline the requirements of the module and explain the purpose and production of the Development Action Plans and evidence of Continuous Professional Development. Throughout the year there will be a series of specialist guest lectures which will provide underpinning CPD knowledge for portfolio evidence.

The support element will include a series of individual tutorials phased throughout the calendar year, together with quarterly meetings held collectively with lecturers, students and employers, either at their place of work or on-line via MS TEAMS. The purpose of these will be to provide formative feedback on evidence gathered in the workplace, as well as identifying areas for further development.

Indicative Syllabus Outline

The expectations of the Professions and Industry and Organisations.

Producing a Development Action Plan and record of min. 2 years CPD, planning-job-related skills eg target setting, action planning, progress monitoring, evaluation, health and safety training, responsibilities and implications, reflective practices, rescheduling, contingency planning, reviews (daily/weekly review, periodical), work logs;

Portfolio Development, Portfolio structure and contents.

Research in practice.

Reflective Practice.

Indicative Bibliography:

Please note the essential reads and other indicative reading are subject to annual review and update.

Essential Reads

Bolton, G. (2018), *Reflective Practice: Writing and Professional Development.* 5th ed. Los Angeles: Sage.

Other indicative reading

Professional Institutions Routes to Membership - Incorporated Engineer (Institution of Civil Engineers)

Professional Institutions Code of Conduct.(Institution of Civil Engineers)

JBM Guidance on providing evidence for programmes of Further Learning to an appropriate level for IEng. (Joint Board of Moderators)

Websites:

Employability skills – the Glyndŵr Graduate

Each module and programme is designed to cover core Glyndŵr Graduate Attributes with the aim that each Graduate will leave Glyndŵr having achieved key employability skills as part of their study. The following attributes will be covered within this module either through the content or as part of the assessment. The programme is designed to cover all attributes and each module may cover different areas. Click here to read more about the Glyndwr Graduate attributes

Core Attributes

Enterprising Ethical

Key Attitudes

Commitment Confidence Adaptability

Practical Skillsets

Digital Fluency
Organisation
Critical Thinking
Emotional Intelligence
Communication
