

MODULE SPECIFICATION FORM

| Module Title: Quantitativ | for Bus | iness | Level | : 3 | Credit Value: 20 | | | |
|---|--|--|--------------|----------------|--|---------------------|--|--|
| | | | | | | | | |
| Module code: BUS317 | : Centre: GADC J | | JAC | ACS2 code: N/A | | | | |
| | | | | | | | | |
| Trimester(s) in which to be offered: 1 With effect from: September 2013 | | | | | | | | |
| Office use only: Date approved: August 2013 | | | | | | | | |
| To be completed by AQSU: | . | Date revised: September 2014 (to include new | | | | | | |
| To be completed by Algeo. | | Date for | prog titles) | | | or r (to monday now | | |
| Version no: | | | | | 2 | | | |
| | r | | | | | | | |
| Existing/New: Existing | Title of module being replaced (if any): | | | | | | | |
| | | | | | | | | |
| Originating Academic Department: | Business and Management | | _ | dule ader: | Chris Jones (Bindu Shaiju for IFY at GUL) | | | |
| | | | | | | | | |
| Module duration (total hours): | 200 | - · · · · · · · · · · · · · · · · · · · | | | Core to the Foundation Year | | | |
| Scheduled learning & teaching hours | 50 | appropriate): Business Strand | | | | | | |
| Independent study hours | 150 | | | | | | | |

| Programme(s) in which to be offered: | Pre-requisites per |
|--|--------------------|
| International Foundation Year of: | programme |
| | (between levels): |
| DA (Hana) Assounting and Finance (including Foundation Veer) | (between levels). |
| BA (Hons) Accounting and Finance (including Foundation Year) | |
| BA (Hons) Business (including Foundation Year) | None |
| BSc (Hons) Entrepreneurship (including Foundation Year) | |
| BA (Hons) Global Business (including Foundation Year) | |
| BA (Hons) Hospitality, Tourism and Event Management (including | |
| | |
| Foundation Year) | |
| BSc (Hons) Marketing and Consumer Psychology (including | |
| Foundation Year) | |
| , | |
| | |

Expected Learning Outcomes:

At the end of this module, students will be able to:

Knowledge and Understanding:

- 1. Understand the rules of numeracy in the business context
- 2. Make and apply calculations relevant to business
- 3. Utilise algebraic methods to solve business problems
- 4. Construct and use graphs, charts and diagrams in a business context
- 5. Apply statistical methods to provide business and management information

Transferable/Key Skills and other attributes:

- Develop numeric and quantitative skills
- Think logically and creatively
- Demonstrate time management/organisational skills
- Develop interpersonal/communication skills
- Develop critical thinking skills
- Work independently and in teams
- Learn through reflection on practice and experience.

Assessment:

Students will be expected to demonstrate practical understanding of quantitative methods and concepts through the following:

Assignment 1 Problem solving exercises Assignment 2 Examination

| Assessment number | Learning Outcomes to be met | Type of assessment | Weighting | Duration (if exam) | Word count (or equivalent if appropriate) |
|-------------------|-----------------------------------|--------------------|-----------|--------------------|---|
| One | 1 - 5 | Coursework | 50% | | n/a |
| Two | 1 - 5 | Examination | 50% | 1.5 hours | n/a |

Learning and Teaching Strategies:

The module will normally be delivered through lectures and workshop based tutorials with online learning support through the University VLE. Lectures are used for the delivery of theory and explanation of methods, illustrated with examples, and for giving general feedback on marked work. Tutorials are used to help develop the students' abilities at applying the theory to solving problems, to identify and resolve specific queries raised by students and to allow students to receive individual feedback on marked work.

Individual students will be engaged in independent and directed study and will be expected to seek practical advice and technical support and guidance as necessary.

Syllabus outline:

- 1. Basic Rules of numeracy
- 2. Making and apply calculations relevant to business
- 3. Use algebraic methods to solve business problems
- 4. Constructing and using graphs, charts and diagrams in a business context
- 5. Statistical Methods
- 6. Application of the laws of probability to find solutions to business problems.
