Module aims

This module will support students in carrying out an independent research dissertation or business project on a topic directly related to their working context and programme specialism. The aims of the dissertation/business project are to support students in identifying a contemporary managerial problem that is sufficiently complex to warrant investigation as a means of identifying possible solutions. Enable students to apply knowledge and expertise gained during the taught element of the programme; demonstrate mastery of a specific area of the subject; and facilitate the development of applied research skills. To provide an insight into the nature and make up of academic research and to enable students to undertake a focussed dissertation research project.

Module Learning Outcomes - at the end of this module, students will be able to:

1	Develop a viable research question with a supporting aim and objectives that demonstrates rigour and is ethically sound.
2	Search literature relating to the proposed research topic in a systematic manner and synthesise and critically evaluate the literature to produce a narrative collating the review findings in support of a specific research question.
3	Develop, outline and work within a comprehensive research framework which integrates relevant research methodologies; research design; research quality measures and any ethical issues related to the research.
4	Analyse data in a critical manner appropriate to the methodology outlined and present and review the results/findings in an appropriate format.
5	Synthesise the research findings, and propose strategic recommendations of relevance to both practitioners and academics.

Assessment

Indicative Assessment Tasks:

This section outlines the type of assessment task the student will be expected to complete as part of the module. More details will be made available in the relevant academic year module handbook.

Assessment 1 (18,000 words) produce a dissertation or business research project with a clear structure that demonstrates academic writing competence and the use of accurate referencing. The extended writing piece will be framed by research questions, derived from reviewing academic literature/business data and subsequently creating the appropriate research methodology, completing data collection & analysis which leads to further discussion and conclusions. This will aid future application of strategic recommendations or areas for future research.

Assessment number	Learning Outcomes to be met	Type of assessment	Weighting (%)
1	1, 2, 3, 4, 5	Dissertation/Project	100

Learning and Teaching Strategies

The learning and teaching strategy will consist of formal lectures to present theory, principles and practices which will form the foundation of the learning outcomes. Students will be encouraged to interact and contribute as a means of developing critical skills. Tutorials will be activity based using real world case studies and live examples to apply the theory into practice and develop their decision making and evaluating skills. In addition, students will be encouraged to undertake self-directed study and further research on selected topics to acquire additional perspectives which will provide them with a deeper understanding of the topics covered.

Indicative Syllabus Outline
