Module Synopsis to be printed in the catalogue

This module will focus on the skills required to be an effective ALNCo under the ALNET. The module will require detailed reflection on areas of personal strength and areas for development. Case study scenarios will be used to explore the functions and responsibilities of the Additional Learning Needs Coordinator (ALNCo) in relation to children, families and inter-professional working. Students will be required to demonstrate a detailed knowledge of appropriate setting wide strategies to support those with ALN.

In this module, case study scenarios will be used to explore the functions and responsibilities of the Additional Learning Needs Coordinator (ALNCo) in relation to children, families and inter-professional working. This module is optional for all students but becomes core once selected.

Is there a placement component to the module? Please provide details.	No
Will the module be delivered in collaboration with another organisation? Please provide details.	All institutions
What percentage of the module will be taught in Welsh? Please outline examples, e.g. mentorship or personal tutoring, etc)?	100%

Module Aims

This module aims to:

1. Develop a detailed understanding of the role of the ALNCo and the statutory framework, recognising the complexities of the role;
2. Distinguish and analyse the key issues surrounding working with others e.g. partnership working with the multi-disciplinary team and inter-professional working;
3. Explore and evaluate the planning and organisation of interventions and strategies for the support of ALN and inclusion in line with recognised professional standards;
4. Critically examine the key principles and practice of equality and diversity within the field of ALN and inclusion.

Module Intended Learning Outcomes

By the end of the module the student should be able to:

1. Critically examine the specific functions and responsibilities of the ALNCo and the impact this has on staff, children and their families.
2. Evaluate effective partnership working in the context of ALN, and demonstrate a critical awareness of the benefits and challenges.
3. Develop a strategic plan to implement appropriate interventions and strategies for the support of ALN in students' context;
4. Evaluate modes of effective leadership and management of ALN within the whole setting.

Relevant Programme Outcomes

- K1. An in-depth, systematic and advanced knowledge of the complexity and multi-faceted nature of education, both in their own context and beyond.
- K2. A critical evaluation of current policy, theoretical and practice-based perspectives at a local, national and international level.
- K3. A critical reflection and interpretation, synthesis and application of knowledge and research in their own professional contexts.
- K7. A systematic acquisition of a significant body of knowledge in their area of professional practice.
- K8. The ability to communicate accurately and clearly to a wide range of audiences.
- S1. Apply engagement with theory and evidence to develop new personal and professional perspectives of own professional practice.
- S2. Arrive at evidence-informed conclusions relating to complex issues in education in general, and in their area of professional practice in particular.
- S8. Develop clear and appropriate writing styles in Welsh or English, which are accessible to a range of audiences.
- S9. Apply their knowledge, understanding and transferable skills to engage with, support and where appropriate, to influence others.

Transferable/Employability/Graduate Skills

I = included in module content; A = included in module assessment; N/A

Master's degrees are awarded to students who have demonstrated:

1. A systematic understanding of knowledge, and a critical awareness of current problems and/or new insights, much of which is at, or informed by, the forefront of their academic discipline, field of study or area of professional practice.

Students will be assessed for their knowledge and critical awareness relating to the module topic. All students will be expected to relate this to their own practice.

2. A comprehensive understanding of techniques applicable to their own research or advanced scholarship, and;
3. Originality in the application of knowledge, together with a practical understanding of how established techniques of research and enquiry are used to create and interpret knowledge in the discipline.

Students will be introduced to, and expected to engage critically with, the core literature, evidence and techniques for enquiry in relation to the module topic. This is in order to demonstrate the appropriate application of research and scholarship in their own practice and their critical evaluation of the same, in order to arrive at an ever-deeper understanding of the topic as it applies to professionals.

4. Conceptual understanding that enables the student:
 - to evaluate critically current research and advanced scholarship in the discipline
 - to evaluate methodologies and develop critiques of them and, where appropriate, to propose new hypotheses.

Students will be supported to build skills in relation to critical analysis and develop a critical appreciation of the evidence they have engaged with in order to conceptualise and apply the knowledge in this topic to their own practice, and to develop their own theories of action in relation to the topic.

Typically, holders of the qualification will be able to:

1. Deal with complex issues both systematically and creatively, make sound judgements in the absence of complete data, and communicate their conclusions clearly to specialist and non-specialist audiences.

Students will be encouraged to understand that there are no 'right answers' in their discipline and that effective professional practice involves making judicious decisions on their own account, using evidence to guide their choices and using reflection to evaluate them. In the course of their practice, students will be encouraged to ensure that their use of their growing knowledge base enables them not only to develop as professionals, but also to work with peers, learners, parents and carers, ensuring that they can communicate effectively with a range of audiences.

2. Demonstrate self-direction and originality in tackling and solving problems and act autonomously in planning and implementing tasks at a professional or equivalent level.

Assessments are all designed to require students to show how they are able to problematise their practice, and how they can use evidence, action planning and reflection to solve problems both autonomously and in collaboration with peers.

3. Continue to advance their knowledge and understanding, and to develop new skills to a high level. **All module content is intended to challenge students to reconsider what they think they know, to adopt critical mindsets and to be ready to adapt what they do, in light of the new knowledge and understanding they encounter during the module.**

4. And holders will have the qualities and transferable skills necessary for employment requiring:
 - the exercise of initiative and personal responsibility
 - decision-making in complex and unpredictable situations
 - the independent learning ability required

Throughout the module, students will be encouraged to:

- a. Form conclusions about their own practice such that they become more confident in making decisions both with, and in the absence of all of the information they need.
- b. Be reflective such that they can take responsibility for the decisions they make.
- c. Understand where they can turn to in order to further inform their decision-making.
