Module Synopsis to be printed in the catalogue - please provide a short outline of the module.

This module explores theories of leadership and innovation with specific focus on the Curriculum for Wales. Students will critically evaluate different approaches to leadership and apply those theories to their own professional settings and contexts. Furthermore, the context of leadership within the Curriculum for Wales will be explored with emphasis on understanding dispersed leadership and management of Areas of Learning and Experience with reference to teacher agency and responsibility. The module will also draw upon key philosophical and theoretical debates regarding pedagogical theory and allow students to explore their application within their own educational settings and contexts. Additionally, the module will draw upon innovative strategies for curriculum, design, implementation and management and allow students to reflect on their application within their own educational settings and contexts.

Notes to be printed in catalogue - please state if the module is a core, compulsory or optional module for a programme. Please outline the target audience for this module, etc.

This module will explore key issues regarding Curriculum leadership and innovative practice, drawing on theoretical and philosophical debates

Transferable/Employability/Graduate Skills

I = included in module content; A = included in module assessment; N/A

Master's degrees are awarded to students who have demonstrated:

1. A systematic understanding of knowledge, and a critical awareness of current problems and/or new insights, much of which is at, or informed by, the forefront of their academic discipline, field of study or area of professional practice.

Students will be assessed for their knowledge and critical awareness relating to the module topic. All students will be expected to relate this to their own practice.

2. A comprehensive understanding of techniques applicable to their own research or advanced scholarship, and;
3. Originality in the application of knowledge, together with a practical understanding of how established techniques of research and enquiry are used to create and interpret knowledge in the discipline.

Students will be introduced to, and expected to engage critically with, the core literature, evidence and techniques for enquiry in relation to the module topic. This is in order to demonstrate the appropriate application of research and scholarship in their own practice and their critical evaluation of the same, in order to arrive at an ever-deeper understanding of the topic as it applies to professionals.

4. Conceptual understanding that enables the student:
 - to evaluate critically current research and advanced scholarship in the discipline
 - to evaluate methodologies and develop critiques of them and, where appropriate, to propose new hypotheses.

Students will be supported to build skills in relation to critical analysis and develop a critical appreciation of the evidence they have engaged with in order to conceptualise and apply the knowledge in this topic to their own practice, and to develop their own theories of action in relation to the topic.

Typically, holders of the qualification will be able to:

1. Deal with complex issues both systematically and creatively, make sound judgements in the absence of complete data, and communicate their conclusions clearly to specialist and non-specialist audiences.

Students will be encouraged to understand that there are no 'right answers' in their discipline and that effective professional practice involves making judicious decisions on their own account, using evidence to guide their choices and using reflection to evaluate them. In the course of their practice, students will be encouraged to ensure that their use of their growing knowledge base enables them not only to develop as professionals, but also to work with peers, learners, parents and carers, ensuring that they can communicate effectively with a range of audiences.

2. Demonstrate self-direction and originality in tackling and solving problems and act autonomously in planning and implementing tasks at a professional or equivalent level.

Assessments are all designed to require students to show how they are able to problematise their practice, and how they can use evidence, action planning and reflection to solve problems both autonomously and in collaboration with peers.

3. Continue to advance their knowledge and understanding, and to develop new skills to a high level.
All module content is intended to challenge students to reconsider what they think they know, to adopt critical mindsets and to be ready to adapt what they do, in light of the new knowledge and understanding they encounter during the module.

4. And holders will have the qualities and transferable skills necessary for employment requiring:
 - the exercise of initiative and personal responsibility
 - decision-making in complex and unpredictable situations
 - the independent learning ability required

Throughout the module, students will be encouraged to:

- a. Form conclusions about their own practice such that they become more confident in making decisions both with, and in the absence of all of the information they need.
- b. Be reflective such that they can take responsibility for the decisions they make.
- c. Understand where they can turn to in order to further inform their decision-making.

Rationale for Assessment

Assessments are designed to ensure parity of provision and experience for all students. All students will benefit from formative feedback throughout the module which will be bespoke to their needs and will complete the same summative assessment per module.

Rules for Multiple Assessments (**Please delete as appropriate.*)

There are no multiple assessments for this module.

In what ways will students receive feedback on assessed work, including formal examinations? *Please delete those statements that do not apply. This list is not exhaustive and you may add additional feedback methods as appropriate.*

Turnitin	Feedback against the assessment rubric and a word bank. Use of feedback box on Turnitin (with an option for three minutes of verbal feedback as appropriate). Marks to be returned via Turnitin.
----------	--

Please provide details of inclusive assessment provision/access to specialist requirements. This should include details of alternative assessment which may be undertaken by students with specific requirements.

Students will be able to submit assignments in a format that is adapted to their individual needs where an Individual Support Plan (or other local equivalent) is in place, or where appropriate reasonable adjustments have been negotiated. This may include additional time for completion of assignments, support with reading and/or academic writing and access to assessment rubrics in various formats (electronic, large print, specific fonts). All students are also able to submit applications for extenuating/mitigating circumstances as required throughout completion of the module.

Please provide details of how students would redeem a failure in the module. **N.B. Level 6 students on traditional programmes will resit/ resubmit according to level 6 regulations*

All students have two opportunities to retrieve a failure in a module (second and third attempts are capped at 50%). No further retrieval opportunities will be offered.
